

RECEIVE KITS

Professional Two Way Radio Accessories

2ACY

Earbud

The model 2ACY is an affordable receive only accessory for use on a wide range of radio platforms. It is available with 3.5 mm MONO, 2.5 mm MONO and 3.5 mm Stereo Screwed connectors. The ear bud has a comfortable foam cover that is easily replaced.

2DH

D Type Ear Hook

The model 2DH ear hook speaker is based on the very popular D configuration of ear hook. This is designed to be worn on the ear. This is very popular where many users share the same accessory. The 900 mm of durable polyurethane cable is ample for most applications. It is available with 3.5 mm MONO, 2.5 mm MONO and 3.5 mm Stereo Screwed connectors.

5ACY

Light Weight Headset

The model 5ACY light weight headset is an affordable receive only accessory for use on a wide range of portable radio platforms. It is available with 3.5 mm MONO, 2.5 mm MONO, and 3.5 mm screwed stereo connectors. The light weight headset has a comfortable foam cover fitted to a 52 mm speaker pad that is easily replaced. This type of accessory is recommended where a high level of comfort is necessary.

6ACY

Dual Muff Headset

The 6ACY dual ear cup stereo headset is an affordable receive only accessory for use on a wide range of radio platforms. The medium size ear cups are suitable for medium noise environments. It is available with 3.5 mm MONO, 2.5 mm MONO and 3.5 mm screwed stereo connectors.

9ACY

Ear Hook - Black

The model 9ACY is an affordable, black in colour, receive only accessory for use on a wide range of radio platforms. It is available with 3.5 mm MONO, 2.5 mm MONO and 3.5 mm screwed stereo connectors. The ergonomically designed ear hook has a comfortable foam cover that is easily replaced.

9ACY-S

Ear Hook - Beige

The model 9ACY-S is an affordable, beige in colour, receive only accessory for use on a wide range of radio platforms. It is available with 3.5 mm MONO and 2.5 mm MONO connectors. The ergonomically designed ear hook has a comfortable foam cover that is easily replaced. By far our most popular receive only accessory.

9MR

On The Ear Hook

The model 9MR ear hook is an on-the-ear design which has replaceable foam covers and can be worn on either the left or right ear. It is available with 3.5 mm MONO and 2.5 mm MONO connectors.

11ACY

Acoustic Air Tube

The 11ACY is an acoustic air tube style of speaker. It is especially good for covert operations. The efficient acoustic air tube design delivers clear concise audio directly to the ear canal. This type of accessory is especially popular in the TV and security industries where concealment and comfort of the earpiece is seen as a necessity.
